Design & mouldflow analysis  
Moulds manufacturing

## Our Values

### Customer Satisfaction

We work 24 h per day, 255 days per year, to give clients top quality products at the most competitive price.

### Delivery

We produce and deliver plastic components to 28 factories in several countries. We transform every year 28.000T of high quality raw material in 46.700 million parts to sell to our costumers with maximum respect of the delivery time.

## Our Values

### People

Our 220 employees come from 10 Countries and 4 Continents.

## Technology

Three production plants, more than 23.000 sqm of research, developments and innovation, are well equipped with 55 IMMs from 90 to 1800T with:

- Sequential injection
- Gas assisted injection
- Heat and cool technology
- Overmoulding injection
- Insert moulding technology
- 2k technology
- Production process control and analysis of the results

Free of electrostatic discharge area dedicated to the assembly and testing of electronic components.

## Experience

From one raw plastic part we can reach up to 100 different customized aesthetical variants using:

- Silkprinting
- Tampoprinting
- Hot foil
- Digital technology

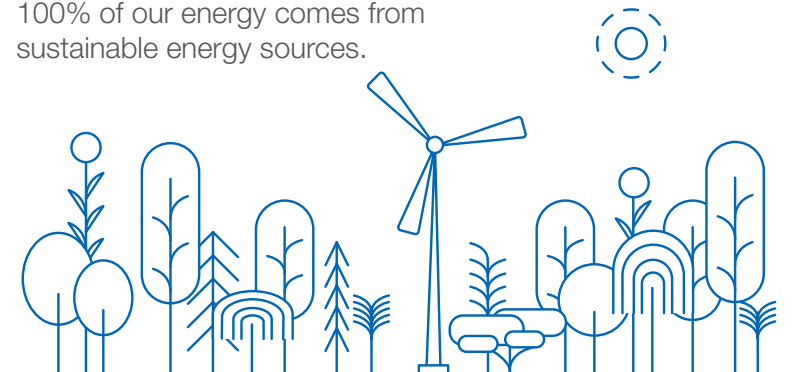

## Quality Control

We take quality seriously

## Sustainability

We use only certified raw materials, 100% recyclable.  
100% of our energy comes from sustainable energy sources.
